

25 April 1958

MEMORANDUM FOR: Deputy Director (Intelligence)

SUBJECT: 1958 Munich Photogrammetric Weeks

1. Attached hereto is the 1958 Munich Photogrammetric Weeks brochure and letter received from [redacted] You may recall that I mentioned this program some months ago and indicated that I would like to apply if you felt that there was a chance that I could attend. You suggested that I could at least apply and that we might review the situation when it came time to confirm.

25X1

2. Although the Course lasts for a month, I would be interested only in Part I - September 1 to 13, 1958, which features photogrammetric lectures, discussions and general demonstrations of instruments and exercises to small groups. I believe these international photogrammetric courses to be most worthwhile and can point to a number of techniques and instruments now in our possession which I first learned about during my attendance at the International Photogrammetry Course III in the E.T.H. Zurich in 1948.

3. If it were not feasible to consider my going to the Munich Photogrammetric Weeks this year, I would like to have the opportunity of nominating some other German speaking technicians from the Division who could profit from this training.

ARTHUR C. LUNDAHL
Chief, HTA
